

General Information

Environmental

Post-consumer material

Is defined as waste material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose.

Pre-consumer material

Is defined as material diverted from the waste stream during the manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

Powder Coat Paint: Contains no solvents or lead and as a result releases no Volatile Organic Compounds (VOC's).

Packaging: Contains 20% post-consumer recycled content.

The information containing here in is based upon the most accurate data available at time of issuance.

This form is intended to aid the purchasing entity in the completion of their LEED documentation. It is not intended to replace and specific form(s) that may be required by contract or specification documents.

Rapidly Renewable Materials-Steel Products: Steel by its nature is highly recyclable but is not rapidly renewable.
